Bee Supplies

ABOUT BEE SUPPLIES

Bee Supplies is run by the O'Sullivan family who have been operating since 2007. Paul O'Sullivan is the main contact for Sales. Orders can be made over the phone, by

email or through our online shop. We pride ourselves on offering top quality beekeeping equipment at highly competitive prices. Should you wish us to attend your event or local association meeting please call or email us with the details giving as much notice as possible.

PAYMENT

We accept Cash and Debit or Credit Cards in person or over the phone. Please note that we do not hold details of your credit cards on our system and we will need to take these details every time you make an order. This is to protect your identity in line with the Data Protection Act. You can pay by PayPal through the secure PayPal system on our website. Should you wish to pay using an online banking service please contact Paul.

COLLECTION & DELIVERY

Orders may be collected by prior appointment. Orders for courier delivery weighing up to 25kg will be charged at €9.00 per shipment. Small packet items will be charged at the Post Office rates.

Online ordering is available and watch out for our regular Special Offers.

All prices include VAT wher applicable. Delivery charges may apply. Photographs are for illustration pruposes only. Prices are subject to change without notice. All items remain the property of Bee Supplies until payment has been received in full. All damages or losses must be notified within 3 days of receipt of goods.

Supplies Quality Quality Quality

QUALITY PRODUCTS

We only sell 1st grade frames sourced in the U.K. which are made in accordance to the British Standard Specification. The timber used is made from Russian and Scandinavian redwood. The frames fit together easily which allows the foundation to slide into place.

Our foundation is principally sourced from Peter Kemble in the UK (KBS). KBS have been producing beeswax foundation in the south of England since 1980. They consistently produce excellent quality foundation that has a natural beeswax aroma & bright yellow colour. This wax foundation is the preferred choice amongst long established beekeepers here, in Ireland. During busy periods we also source quality foundation from other suppliers based in the U.K.

When it comes to Beekeeping the suit is a very important part of the equipment. We have been supplying BB

Wear suits for the last few years and have found them faultless. Having sold suits from Europe and beyond we now know that there is no substitute for quality. They are based in the UK and understand Beekeeping They are made from a hardwearing Polyester and Cotton mix and comes in a range of colours & sizes. They are manufactured to the highest standards to suit our weather conditions. The veils on the suits are made from specially stiffened

and UV-resistant netting and are supported away from the face, giving excellent all round vision and protection. The hoods may be unzipped and thrown back when not in use or completely removed. The suit including the veil is completely machine-washable. We can also offer an embroidery services for Company/Team Logos.

The bitterness of low quality remains long after the sweetness of low price is forgotten.

CEDAR HIVES

CANADIAN WESTERN RED CEDAR

Canadian Western Red Cedar is the provincial tree of British Columbia, (Canada) & can live to thousands of years old. A chemical substance is found in mature trees and serves as a natural fungicide thereby preventing the wood from rotting. This effect lasts around a century even after the tree is felled. The soft red-brown timber has a tight, straight grain and few knots. It is valued for its distinct appearance, aroma, and its high natural resistance to decay.

NATIONAL CEDAR HIVE

PAYNES POLYSTYRENE HIVE

The polystyrene hive has many benefits over a wooden version that will last 30+ years. It's made from a very high density material up to 4 times stronger than what is used for packaging. It is lightweight and durable, meaning you get a strong, robust hive that can last 30+ years. Its insulation properties also makes it ideal as less bees are required to maintain the heat for effective brood rearing, this helps improve overwintering and early Spring buildup. A quick lick of paint with any masonry paint is the only maintenance it requires.

Comprises:

Roof, Brood Body, 2 x Supers, Plastic Crown Board, Plastic Queen Excluder, Mesh Floor with plastic entrance block, Runners & Hive Strap.

Option 1: Empty €149 Option 2: Flat €265

With 12 Brood Frames & 24 x Super Hoffman Frames and

Wired Foundation plus 100g bag of nails.

Option 3: Assembled €299

With 12 Brood Frames & 24 x Super Hoffman Frames and Wired Foundation plus 100g bag of nails.

INDIVIDUAL PARTS:

(a) Brood Body €29 (b) Super €25 (c) Poly Feeder €32

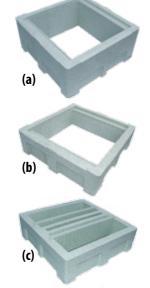

The centre channel is now fully covered and is vastly improved.

A Full size feeder for maximum feeding capacity, holding around

2 gallons (7.5 Litres) to reduce the number of trips back to your hives to feed.

It now has a clear cover over the central channel so that the bees don't

'come out at you' when you remove the lid.

67c Heather Road, Sandyford Industrial Estate, Dublin 18 Telephone **086 177 9900** Website: **www.beesupplies.ie**

PAYNES 6 FRAME NATIONAL POLYSTYRENE NUCLEUS

The Polystyrene Nucleus Hive holds 6 National brood frames and comes complete with a built in Feeder. It has an open mesh floor to help with varroa control and to help with ventilation during transit. Comes with 4 feet to keep the hive off the ground, wooden float for the feeder, a disc entrance for easier control of the entrance and a clear coverboard for easy viewing without completely opening up the hive.

Option 1: Empty €45.00 Option 2: Flat €69.00

With 6 Frames, Wired Foundation

plus 100g bag of nails.

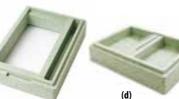

Option 3: Assembled €74.00

With 6 Frames, Wired Foundation

a) An extension for the poly nuc hive allowing a further 6 frames to be used. Now you can expand your colony in the poly nuc itself until you are ready to transfer across to a full size hive at your own pace. These can be stacked as high or as many as you want and can be used along side the supers for poly nuc and the top style feeder. €25.00

(c)

- b) An extension for the poly nuc hive allowing the use of 6 super frames. These can be stacked as high or as many as you like and allow better and easier management of your nucs or small colonies. Can be used in conjunction with the brood box for poly nuc and the top style feeders. **€18.00**
- c) This eke sits underneath the lid of the poly nuc hive. The eke can also be used to give additional space on top of the frames to place fondant or candy during the winter, or for placing varroa treatments such as Apiguard. €14.00
- d) This is a top style feeder for the poly nuc. This allows greater capacity so less visits back to the colony for re fills. Just block the side feeder off in the poly nuc and place this on the top.
 - A clear cover over the centre channel so you can easily see the bees taking the syrup down without opening the hive up making the visits quick and easy. Both syrup chambers are sloping towards the centre so that every drop of feed can be taken down by the bees No waste. €17.50
- e) Give your bees additional ventilation for travelling in the poly nuc hives. Just replace your nuc lid with this ventilated version and stop your bees from overheating. €14.00
- f) Poly Nuc Queen Excluder €7.50
- g) Poly Nuc Crown Board €4.00

67c Heather Road, Sandyford Industrial Estate, Dublin 18 Telephone **086 177 9900** Website: **www.beesupplies.ie**

MAISEMORE NATIONAL POLY HIVE

All our polystyrene bee hives and hive parts are of 100g/Litre and are up to 3 times stronger than polystyrene used in

packaging. When painted with smooth masonry paint these polystyrene hives will last for 30+ years.

They are lightweight, cheaper and durable and have excellent insulation properties to help keep the bees warm through winter.

The polystyrene Brood Chambers and Supers have dovetail joints for easy assembling and do not require runners as they are built into the mould. They come supplied flat packed with screws for assembling or ready assembled. They come shrink wrapped and can be bought individually or as a complete hive. They are compatible with all our wooden National hive parts, frames & accessories but you cannot use a wooden roof with the polystyrene.

They should be painted (outside only) with a masonry paint such as Santex.

Comprises of: Roof, Clear Crown Board,2 x Supers, Plastic Queen Excluder, Brood Body, Open Mesh Floor with Tray and Entrance Block and Hive Strap

Option 1: Empty

Brood and Supers require assembly

EXTRACTION

EXTRACTOR RADIAL 9F, MANUAL, BARREL 52

The 9 frame honey extractor with hand drive with freewheel and brake, one direction. Modern technology enables the innovative manufacturing of the bottom of the extractor. The bottom of the drum is welded without inner edges and is inclined towards the outlet. A welded stainless drainage tap is built in at the lowest point so all the honey can drain out of the extractor. Cleaning the extractor is simple. All parts of a honey extractor which come in contact with honey are made of materials appropriate for managing foods. The lid is made of transparent acrylic glass. The special construction of the legs ensures that the extractor is stable.

EXTRACTOR RADIAL 9F, MOTOR 110W,BARREL 52

The 9 frame honey extractor is powered by an electric motor 110W / 230V with a safety switch which stops the motor, if the lid of the extractor is opened.
